

DAFFODIL GROWTH CYCLE AND PARTS OF THE PLANT

DAFFODIL IDENTIFICATION CHART

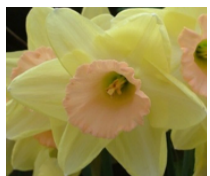

DIVISION 1 – 6

DIVISION 1 – Trumpet Cultivars

One flower to a stem; cup as long as, or longer than, the petals

Narcissus 'Chinese Coral', SYSTEMATIC GARDEN

DIVISION 2 – Large-cupped Cultivars

One flower to a stem; cup more than 1/3 but less than equal to the length of the petals

Narcissus 'Billy Graham', COTTAGE GARDEN

DIVISION 3 – Small-cupped Cultivars

One flower to a stem; cup not more than one-third the length of the petals

Narcissus 'Sinopel', SYSTEMATIC GARDEN

DIVISION 4 – Double Cultivars

One or more flowers to a stem, with doubling of the petals or the cup or both

Narcissus 'Cheerfulness', LAWN & SECRET GARDENS

DIVISION 5 – Triandrus Cultivars

Characteristics of N. triandrus clearly evident: usually two or more pendent flowers to a stem; reflexed petals

Narcissus 'Hawera', COTTAGE GARDEN

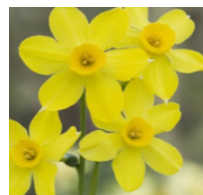

DIVISION 6 – Cyclamineus Cultivars

Characteristics of N. cyclamineus evident: 1 flower to stem; petals significantly reflexed; flower at acute angle to stem, with very short pedicel (neck)

Narcissus 'Itzim', COTTAGE GARDEN

DIVISION 7 – 12

DIVISION 7 – Jonquilla & Apodanthus Cultivars

Characteristics of Jonquilla or Apodanthi evident: 1-5 flowers to a stem; petals spreading or reflexed; corona cup-shaped, funnel-shaped, or flared, usually wider than long; flowers usually fragrant

Narcissus 'Baby Moon', COTTAGE GARDEN

DIVISION 8 – Tazetta Cultivars

Characteristics of Section Tazettae evident: usually 3-20 flowers to a stout stem; petals spreading, not reflexed; flowers usually fragrant

Narcissus 'Martinette', ENTRY GARDEN

DIVISION 9 – Poeticus Cultivars

Characteristics of N. poeticus evident; white petals; cup short or disc-shaped, less than 1/5 the length of petals; cup usually has green or yellow center and red rim; anthers usually at 2 levels; fragrant

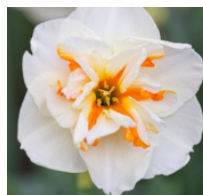

Narcissus 'Actaea', LAWN GARDEN

DIVISION 10 – Bulbocodium Cultivars

Characteristics of Bulbocodium clearly evident; usually one flower to a stem; petals insignificant compared with cup; anthers dorsifixed (i.e. attached more or less centrally to the filament); filament and style usually curved

Narcissus 'Kenellis', SYSTEMATIC GARDEN

DIVISION 11 – Split Corona Cultivars

Cup split usually more than half its length. Two types: a) Collar: cup segments opposite petals; cup segments usually in 2 whorls of 3; b) Papillon: cup segments alternate to petals; cup segments usually in a single whorl of 6

Narcissus 'Broadway Star', ENTRY GARDEN

DIVISION 12 – Other Cultivars

Daffodil cultivars which do not fit the definition of any other division

Narcissus 'Bittern', WINTER GARDEN
