

# SEED COPTER

Explore the science of seed dispersal by building your own seed copter inspired by the maple tree samara seed pods that swirl and fly through the air in Summer and Fall.

- 1 Color the copter.

- 2 Cut along the grey dotted lines.

- 3 Fold along the 2 blue lines to form the copter body.

- 4 Fold along the short green line to form one of the blades. Fold the short orange line in the opposite direction to form the second blade.

- 5 Attach a paperclip to the bottom.

- 6 Hold it above your head and let it go to see your seed copter fly!
